There is no better Corn Land in the State, and it is easily cultivated. We believe that in natural fertility of soil, durability, and in number of bushels of grain produced by the acre, this land will not suffer in comparison with any in the State. The splendid crop now upon it justifies, in our opinion, this assertion. The overseer believes that the present crop of corn on the swamp land will yield, when gathered, from fifteen hundred to two thousand bar-rels. Of the Uncleared Land, most of it is rich Swamp, as Dogs, and will attend to calls promptly, when not otherwise engaged, any distance near the Railroads.
